Q3 PORTFOLIO OPPORTUNITIES

- The Fund thrived amid the ongoing momentum enjoyed by stocks of all varieties. The portfolio's equity allocation even outdid the S&P 500 return by nearly 150 basis points¹ (bps).
- An overweight (6%) in the Materials sector through Precious Metals stocks was a major advantage vs. the index, which has less than a 0.15% allocation. Precious Metals added about 300 bps to return.
- Together, Financials and Consumer Discretionary concentrations provided another boost of nearly 300 bps.

Q3 PORTFOLIO SHORTCOMINGS

- The equity hedge was a net detractor from return, albeit negligible (-0.38 bps).
- The portfolio's worst equity groups were Cable & Satellite, Internet Svcs/Infrastructure, and Movies & Entertainment. All had losses that were bigger than the S&P 500's associated positions.
- Fixed income holdings were not constructive, turning in flat results, as a whole.

IMPORTANT RISK INFORMATION

Fund will suffer a loss if it sells a security short and the value of the security rises rather than falls; short selling could result in unlimited loss. Foreign companies may be less liquid and more volatile; investments may be affected by fluctuation in currency rates, differences in financial standards, and government/economic stability. Debt securities issuers may not be able to make interest or principal payments and/or may suffer adverse changes in financial condition that would lower the credit quality, leading to greater price volatility. The adviser may not correctly anticipate the relative returns and risks of the asset classes in which the Fund invests. See the Prospectus for more details.
